

A beautiful September day in 1995 finds the Santa Fe's "PM Turn" rolling westward past the red sandstone rocks at Manuelito, New Mexico, near the Arizona-New Mexico boundary. Leading the way is G.E. Dash 9-44CW #609. The "PM" designation refers to the Pittsburg & Midland Coal Company mine at Defiance, New Mexico. The coal loads are en route to the power plant at Joseph City, Arizona.
